

CORPORATE

PARTNERSHIP PROGRAM

GIVING DIRECTION TO THE HEALTH INSURANCE INDUSTRY

The National Association of Health Underwriters represents more than 100,000 professional health insurance agents and brokers who provide insurance for millions of Americans. A corporate partnership with NAHU allows you to access membership benefits on behalf of your business, bringing your employees specialized programs and information specific to your company's needs.

PARTNER BENEFITS

- Savings over individual membership rates
- Streamlined billing process: one renewal date, one payment
- Company ownership of the membership slots
- Unlimited access to members-only information on NAHU website
- Full access to the NAHU Compliance Corner
- Additional benefits for groups over 100

BECOME A PARTNER

A prospective corporate partner submits a list of prospective members — including employees who live and work in different states. NAHU staff will review the list, determine appropriate chapter affiliations and calculate prorated dues with the appropriate discount, and a consolidated invoice will be sent to the prospective partner. All memberships are activated upon receipt of payment.

MEMBERSHIP STRUCTURE

A corporate partnership means your company owns the membership, making it easy to maintain current memberships for all your staff. And the more memberships your company owns, the greater the dues discount you receive:

- 10-20 members equals a 3% discount
- 21-50 members equals a 5% discount
- 51-100 members equals a 10% discount
- 100+ members equals a 12% discount

You also simplify the billing process with a corporate listbill.

With the swiftly changing political climate, a corporate partnership ensures all your employees have access to the most up-to-date information available. By adding your voice to the legislative efforts already in place on the national and state levels, you can help establish the future of the health insurance industry.
